

# ///MegaPlus II ES 11000

## MegaPlus II Family

The *MegaPlus II* family of cameras features a unique design consisting of our *MegaPlus II* controller and up to four camera heads. The camera controller allows for easy camera configuration, and provides the intelligence for each camera head such as color space conversion, gamma control, and flat field correction. This family of digital CCD cameras includes both color and monochrome cameras with resolutions up to 11 megapixels.

By making it possible to use multiple camera heads on a single controller, the *MegaPlus II* system easily supports applications requiring large horizontal resolution or acquiring images from multiple angles. The *MegaPlus II* system also lets you mix and match camera heads on a single controller.

## MegaPlus II ES 11000

The ES 11000 consists of an 11-megapixel interline-transfer camera head and controller, offering both CameraLink and Firewire interfaces selectable via our control software - *MegaPlus Central*. The camera supports up to 12-bit monochrome images or 36-bit color images at 4.63 fps for full resolution, and over 13 fps with 4 x 4 binning.

With outstanding image quality and flexibility, the ES 11000 and controller are ideal for most ophthalmology, document scanning, aerial photography, and scientific imaging applications.

## APPLICATIONS

- Flat Panel Inspection
- Ophthalmology
- Remote Sensing
- Digital Photography
- Scientific Imaging and Microscopy

# MegaPlus® II ES 11000
